## ABOUT

First of all, my main characteristic is my passion for learning about new tech and grow professionally, and that's not just a cliché phrase, I've been obsessed with tech ever since I broke my dad's old Compaq Armada 4100, and then installed Windows 95 back into it. Code is a gigantic interest of mine; I trust that my code can and will speak for itself, just as my responsibility and focus do.

## WORK EXPERIENCE

### FULL-STACK ENGINEER

iComm Solutions SAS | Jun 2020 - Dec 2020

- Worked on our telemedicine platform on mostly front-end work with some back-end tasks in Go and PostgreSQL splashed around.

### FRONT-END DEV

Green Tomato Co | Nov 2019 - May 2020

- Maintained the React.js WebApp.
- Assisted our team in porting it to native iOS using Swift.
- Did some photography and graphic design stuff here and there.

### NETWORK INTERN

Qinaya SAS | Feb 2014 - Jan 2017

- Developed and maintained an internal general purpose WebApp and Node.js API for things like inventory and employee management.
- Took general care of our Linux servers (reformatting, installing stuff, troubleshooting, etc) when the main guy didn't wanted to.

And I do have a GitHub account for my personal projects.

## EDUCATION

- |                              |                                     |
|------------------------------|-------------------------------------|
| • FULL-STACK WEB DEVELOPMENT | • BACHELOR OF ARTS, JAZZ PIANO      |
| Acámica                      | Pontificia Universidad Javeriana    |
| 2019 - 2020                  | 2016 - 2020                         |
| • BASIC PROGRAMMING COURSE   | • BACHELOR OF ARTS, AUDIOVISUAL ART |
